Detox & Healthy Living

The human body creates toxins naturally that must also be eliminated. If we are not eating and drinking the necessary items to eliminate the toxins, then our bodies can cause irritation and inflammation of the bodies cells and tissues which then causes sickness and disease.

Moreover, we ingest as well as voluntarily take in toxins through refined foods like sugar and additives, meats injected with steroids and antibiotics, doctor prescribed pharmaceuticals, water pollutants, and drugs.

By increasing your water, vegetable and fruit intake and decreasing your meats, refined sugars and additives, you can improve your health.

About Us

In 2007 Chef Ba’Ron discovered the benefits of juicing. He began with juicing and branched out into a total Vegan lifestyle and then made the leap to the raw food lifestyle. It has been his mission to help people see the benefits of a healthy eating lifestyle. He creates juices with a raw blend of fresh fruits and vegetables with no preservatives. In fact, it was through his success with juices that led him to develop the 90 day detox & healthy living program that begins with a detox, includes loads of fresh live juices, followed by exercise and learning to create raw and cooked dishes.
